Engine Bearings in Standard Size:**

TRE529318

Con Rod Brg Std (Pair)

TRE529319

Main Brg Std (Pair)

TRE529320

Thrust Brg Std (Pair)

The 6090 John Deere[®] engine model was introduced a few years ago as a replacement for the 6081 model that was JD's workhorse for many years. The 6081 has been replaced with the 6090 (which has steel pistons) and is poised to become the future workhorse for John Deere[®] in the popular power range of 187KW (250hp) to 317 Kw (425hp).

Maxiforce is taking a bold step in developing this model and will welcome any comments and advice from our customers and friends regarding this new venture.
